

## Quick Wins Tick List

Below is the quick wins tick list which can be submitted alongside a Listed Building Consent application. Submitting this might be helpful to demonstrate that you have carried out simple measures to reduce energy efficiency already which will not impact the character and significance of your listed building. This could help speed up your application if you submit this.

Please put a tick in the relevant box next to each measure. If there are other energy improvements that have been made to the property that are not included in this list, then please include details about this in a separate section at the end of this document.

Measure	Yes	No	N/A
Draught-proofed windows			
Draught-proofed windows
